

Padding and Margin

- **Padding:** The space between the content of an element and its border. Used to create space inside an element.
- **Margin:** The space outside the border of an element. Used to create space between elements.

Display Property

- **Display Property:** Determines how an element is displayed on a web page.

Display Types

- **Inline:** Elements do not start on a new line and only take up as much width as necessary.
- **Block:** Elements start on a new line and take up the full width available.
- **Inline-block:** Elements are like inline elements but respect width and height properties.

Min-height, Min-width, Max-height, and Max-width in CSS

- **Min-height:** Sets the minimum height of an element.
- **Min-width:** Sets the minimum width of an element.
- **Max-height:** Sets the maximum height of an element.
- **Max-width:** Sets the maximum width of an element.
